23. Problem: (use additional Sheets if necessary) LaRC experiencing problem when running STMGMT stored proc, creates a 'deadlock condition'. NCR ECSed24430 applies a database patch (delivered with by the CCR). All DAACs could be affected so make the TE available to all DAACs. <i>as a TE 4/12/00</i>						
24. Proposed Solution: (use additional sheets if necessary) NCR 24430 is fixed in Release 5A.05, use the Database patch 20 and selected stored procs from 5A.05 at the SMC and provide to the DAACs as a test executable to relieve the deadlock problems. SMC make these files available to ALL DAACs. Refer to continuation page for file names and DAAC instructions. <i>current baseline 4/12/00</i> <i>CM builds a TAR file for the listed files from current SA baseline and delivers to SMC. 4/12/00</i>						
25. Alternate Solution: (use additional sheets if necessary) Take no action now and wait until 5A.05 is available at the DAACs.						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary) DAACs must continue to work around the deadlock conditions and/or modify operating procedures.						
27. Justification for Emergency (If Block 15 is "Emergency"): Resolves problem the LaRC DAAC is experiencing.
